On the Subject of Wires

Wires are the lifeblood of electronics! Wait, no, electricity is the lifeblood. Wires are more like the arteries. The veins? No matter...

- A wire module can have 3-6 wires on it.
- Only the one correct wire needs to be cut.
- Wire ordering begins with the first on the top.

3 wires:

- if (#red == 0): cut second wire
- if (#blue > 1) AND (third != white): cut last blue wire
- else: cut third wire

4 wires:

ASK 'Is SN odd?' 'How many red?'

• if (#red > 1) AND (SN == odd): cut last red wire

ASK 'Describe fourth wire.'

• if (#red == 0) AND (fourth == yellow): cut first wire

ASK 'How many blue?'

• if (#blue == 1); cut first wire

ASK 'How many yellow?'

- if (#yellow > 1): cut fourth wire
- else : cut second wire

5 wires:

ASK 'Is SN odd?' 'Describe 5th wire.'

- if (5th == black) AND (SN == odd): cut fourth wire
 ASK 'How many red / black / yellow?'
- if (#black == 0) AND (#red != 1) OR (#yellow < 2): cut second wire
- else: cut first wire

6 wires:

ASK 'Is SN odd?' 'How many yellow / red / white?'

- if (#yellow == 0) AND (SN == ODD): cut third wire
- if (#yellow!= 1) AND (#red == 0) AND (#white < 2): cut last wire
- else: cut fourth wire
