# On the Subject of Wire Sequences

It's hard to say how this mechanism works. The engineering is pretty impressive, but there must have been an easier way to manage nine wires.

- Within this module there are several panels with wires on them, but only one panel is visible at a time. Switch to the next panel by using the down button and the previous panel by using the up button.
- Do not switch to the next panel until you are sure that you have cut all necessary wires on the current panel.
- Cut the wires as directed by the following table. Wire occurrences are cumulative over all panels within the module.

Red Wires		Blue Wires		Black Wires	
Occurrence	Cut if:	Occurrence	Cut if:	Occurrence	Cut if:
red 1	C	blue 1	B	black 1	A / B / C
red 2	B	blue 2	A / C	black 2	A / C
red 3	A	blue 3	B	black 3	B
red 4	A / C	blue 4	A	black 4	A / C
red 5	B	blue 5	B	black 5	B
red 6	A / C	blue 6	B / C	black 6	B / C
red 7	A / B / C	blue 7	C	black 7	A / B
red 8	A / B	blue 8	A / C	black 8	C
red 9	B	blue 9	A	black 9	C
